

README

This personal webpage aims at giving a brief description of the individual and passions and hobbies which is the continuation of A1 and A2. The primary intention behind developing this website was to establish a professional website where I can express myself and talk about my aspirations and hobbies in a professional environment.

All the webpages have a notification that pops up when opened and a splash page where the user is greeted with a message before entering the page.

The website was developed by a undergraduate first year student and it may contain minor inconsistencies and flaws as part of the lack of experience in development.

The webpage was developed using HTML, CSS and JavaScript.

and <script>

Attributes: rel, type, href, name, id, alt, width, height, for, placeholder, rows, and src

Inline styles: style attribute

JavaScript code: addEventListener and querySelector methods.

This is the primary webpage where the key components and information is given about the individual. The webpage uses a horizontal navigation menu where it is linked to other websites that are relevant to this webpage.

The webpage has five parts where the header of the webpage consists of the discription of the individual and basic information followed by an image. The following part of the website describes the passions and interests of the individual and followed by a form which is aimed at knowing the user's hobbies.

Additional features of the webpage include a splash page where the viewer is greeted with a message saying “Welcome to my Webpage” while the page loads. Moreover, the webpage also displays a notification where the user is greeted with the same message. The website consists of three buttons where the color scheme changes when clicked in order to improve the accessibility of the user.
